## Tru-Test introduces Bluetooth® XR3000

News release provided by Tru-Test

MINERAL WELLS, Texas — Tru-Test, the world leaders in weighing, introduces what it calls the newest and most advanced livestock scale indicator in the marketplace — the Bluetooth® XR3000. The Bluetooth XR3000 allows communication with electronic identification (EID) or radio frequency identification (RFID) readers, desktop computers or laptops using Bluetooth® wireless technology.

Record weight, average daily gain (ADG), EID, visual ID, date of birth, breed, vaccines, animal histories, and much more. Download your animal data into most animal management software programs.

The Bluetooth XR3000 indicator is compatible with all Tru-Test scale load-bar and load-cell systems. Equipped with an internal rechargeable battery and two-year warranty, the Bluetooth XR3000 collects and

livestock scale indicator.**

stores animal data chuteside, allowing you to make key animal management decisions quickly and easily.

The Bluetooth XR3000 is sealed against dirt & moisture with an ingress protection rating of IP67. Like all Tru-Test scale indicators, the Bluetooth XR3000 locks on a stable weight within 3-6 seconds, regardless of animal movement.

Call Tru-Test toll-free at 1-800-874-8494 or visit [www.tru-test.com](http://www.tru-test.com) for more information.

**Company Note:** Tru-Test has been designing, manufacturing and marketing the world's leading electronic livestock weighing systems for nearly 25 years. Its in-house research and development capability has created leading livestock management systems that are in use throughout New Zealand, Australia, Europe and North and South America.
